**TREES WILL BE DELIVERED TO  
YOUR DRIVEWAY ONLY AFTER  
OCTOBER 19th DURING REGULAR  
BUSINESS HOURS. YOU WILL BE  
CONTACTED PRIOR TO DELIVERY.**

# 32nd Annual Tree Program Order Form

Join the Village's reforestation efforts by ordering trees for fall planting in your yard. The trees are purchased through the Suburban Tree Consortium (STC), which is comprised of 30 municipalities in the western suburbs who banded together to contract with Wilson Nurseries of Hampshire, Illinois. Although there is no guarantee that accompanies the trees, mortality within the Consortium has been approximately 1% in recent years.

Because the trees will be dormant at the time of delivery, conditions will be ideal for the development of a healthy root system. However, since deliveries are not until late October, residents are urged to plant their trees promptly after receiving them to avoid any danger of freezing or drying. Since the trees are grown locally, they are well-adjusted to soil conditions. Also, since they are balled and burlapped, the trees adapt more readily to their new location and do not require extensive pruning.

Please remember that, under the provisions of the Village's tree regulations, a permit must be obtained if any of the trees purchased through this program are to be planted in the parkway. There is no fee for the permit, however, your application should be approved before you accept delivery.

As shown on the order form, the following trees will be available for purchase. Some quantities are limited and are first come, first serve. Pictures are available for inspection at the Village Hall:

**Autumn Blaze Maple - Brilliant and long lasting orange red color. Broadly oval form with medium green foliage. This maple is fast growing and will benefit from pruning. Height to 50 feet.**

**Common Hackberry - Native tree that adapts to tough urban conditions. Small berries turn orange-red to dark purple in the fall. The bark has a distinctive cork like bark with a warty texture. Medium to large in size. Height from 40 to 60 feet.**

**Crabapple - White Flower Small ornamental tree with rounded form and dark green foliage. Abundant flowers in spring, form attractive fruit that remain on the tree into winter. Disease resistant. Height to 20 feet.**

**Hybrid Elm - Dutch elm disease resistant with rapid growth, pleasing form, and good foliage. The crown is symmetrical and dense when young, becoming arching in maturity. Height from 40 to 60 feet.**

**Japanese Tree Lilac - Small ornamental tree with dense oval crown. Produces large 5-6" clusters of small creamy white flowers in early summer when few other trees are blooming. Height from 15 to 25 feet.**

**Linden - Dense pyramidal form with dark green leaves that turn yellow in fall. Fragrant flowers in June. Very tolerant of harsh soil conditions. Height from 50 to 60 feet.**

**Locust - Rapid growing small leafed shade tree. Pyramidal form with dark green leaves turning to golden yellow in the fall. A very tough tree which is good for harsh sites. Salt tolerant. Height from 35 to 50 feet. \$85**

**Sugar Maple - Moderate growing shade tree. Upright oval to rounded canopy. Autumn foliage ranges from yellow to orange to reddish orange. Tolerates less than ideal conditions. Height 50 to 70 feet.**

**5' Mission Arborvitae - Small evergreen shrub with a soft pyramidal form. Can be used as a specimen plant or an accent planting, and privacy hedge. May be sheared to maintain smaller heights. Height to 15 feet.**

**Orders must be placed no later than Friday, October 7, 2011. There is a delivery fee of \$10/tree. Tree delivery will begin after October 19th and trees will only be delivered to the driveway.** Residents will be contacted prior to delivery. We cannot make arrangements for special deliveries at another time. Delivery could be delayed if it rains. If this happens, residents who ordered trees will be notified by telephone and given another delivery date.

**SEE REVERSE SIDE FOR ORDER FORM**

## FALL BRUSH CHIPPING
